LIFTING DEVICE FOR PRESSING CONTAINERS TO CONTAINER
FILLING MACHINES

ABSTRACT OF THE DISCLOSURE

A beverage bottling plant for filling bottles with a liquid beverage filling material, and a container filling lifting device for pressing containers to container filling machines. The lifting device includes a stop system that permits positioning of a bottle at a first level, for filling with a still beverage and for positioning a bottle in a second position at a higher level than the first level for filling the bottle with an effervescent beverage, in conformity with the pressure exerted by a pressure medium. The abstract of the disclosure is submitted herewith as required by 37 C.F.R. §1.72(b). As stated in 37 C.F.R. §1.72(b): A brief abstract of the technical disclosure in the specification must commence on a separate sheet, preferably following the claims, under the heading "Abstract of the Disclosure." The purpose of the abstract is to enable the Patent and Trademark Office and the public generally to determine quickly from a cursory inspection the nature and gist of the technical disclosure. The abstract shall not be used for interpreting the scope of the claims. Therefore, any statements made relating to the abstract are not intended to limit the claims in any manner and should not be interpreted as limiting the claims in any manner.
